## POD-X PODIUM LECTERN

A great choice for use indoors and outdoors, in training facilities, conference rooms, exhibition centres, boardrooms & any learning or work space with modern technology demands.

POD-X is a lightweight, aluminum lectern that is tough enough to withstand daily use and light enough to effortlessly tilt and push from one space to another.

Height adjustable for universal access, it showcases instant AV & IT connectivity, charging sockets, a non-reflective inclined worktop and built-in wheels.

Style it your way. Specify your logo application, colours and finish to compliment your brand and venue.

Add options and accessories to enhance your presentation experience.

## FEATURES

### Technology at your fingertips

Just connect your external device to the input panels for instant integration with your presentation equipment. Charging sockets ensures your external devices never run out of power.

### Maximum comfort

The generously sized benchtop provides ample room to spread your presentation material. The inclined surface with metal rail stop prevents items from sliding off.

### Electric height adjustment

Simply push a button to quickly and silently, raise or lower the height of the lectern to your most comfortable height.

### Portability

The intuitively designed base with built-in wheels makes the POD-X effortless to relocate around a stage and from venue to venue.

### Easy storage

Once you have rolled POD-X into storage, simply push a button to lower its height to 785mm to reduce the space it takes up.

Lower input panel with 2 XLR inputs and power point.

Height adjustment control buttons and input panel with space for optional additional inputs.

## STYLE IT YOUR WAY

### Add your logo

Add your logo to the interchangeable logo panel. Select from vinyl print, acrylic print or 3D laser cut. Order additional panels if required.

An LED illumination strip highlights your logo to your audience. A switch on the upper input panel enables you to turn this lighting on or off as you please.

### Select your colours and finish

POD-X is available for immediate delivery in black or white with a black base and benchtop, both finished in a matte-powder coat.

Custom colours, gloss finish and timber wrap available upon request.

Curved metal logo panel attaches to the column with magnets.

## SPECIFICATIONS

- **Weight:** 27.2kgs (60lb)
- **Height adjustment:** 785 - 1085mm (31 - 42")
- **Upper input panel:** 12V USB charging outlet, power point & space for additional inputs
